

Homework

EE103

Due: 10/26/2014 (11:59 PM)

We know that the following system of equations has an integer solution. Write a complete C program which can find the solution of this equation system .

$$x + y = 5$$

$$x - y = 1$$

Good Luck!

PS: The control structures and statements we have seen in the lectures up to now will be sufficient.
